

# NATURAL GREEN® ROSÈ WINE

CONTAINS NO ADDED SULPHITES

Certified product, use of indigenous yeasts.

Biodiversity and sustainability have given birth to a project in the respect of the vineyards and territory to produce a wine tied to tradition and in this way to leave a healthy environment to our children. We do not use GMOs, herbicides and chemical fertilizers, we reduce the treatments in the vineyard to minimum and practice the sexual confusion to combat parasites of the grapevine in order to get “wild” grapes. Our grapes are hand-picked and checked in the vineyards of medium and high hills of our lands. We do not use any protein allergen and enzyme, but exclusively yeasts that naturally grow on our grapes. We settle and we clarify to cold. We do not add any sulphites to protect our wine. The materials we use to bottle our wine are all recyclable.

**Type of wine:** Rosè

**Location:** municipality of Castellinaldo, Gallarini location.

**Soil and exposure:** facing east with tuffaceous marl clay and limestone.

**Variety of grape:** Nebbiolo.

**Alcohol content:** 10,5%
